

OptiBond™

The OptiBond charged slide is ideal for dermatology labs. These high-quality charged slides attract formalin fixed or frozen sections to ensure high quality tissue adhesion, turnaround times are met and eliminates recuts. OptiBond slides ensure that you are able to provide critical diagnosis the first time around.

Features

- Made of optical high-quality glass
- Available in five colors
- Smooth and easy to write on or print on
- Provides excellent adhesion for slide labels
- Compatible with all major manufacturer automated printers

Benefits

- Crystal clear optics
- Economical slides for dermatology
- Ensures consistent barcode scanning
- Superior print quality
- Minimizes tissue loss
