## Section 3. Hazards Identification

### Emergency Overview

The substance is toxic to lungs, mucous membranes. Repeated or prolonged exposure to the substance can produce target organ damage. Repeated or prolonged contact with spray mist may produce chronic eye irritation and severe skin irritation. Repeated or prolonged exposure to spray mist may produce respiratory tract irritation leading to frequent attacks of bronchial infection.

### Potential Health Effects

**Eye**

Extremely hazardous in case of eye contact. May produce tissue damage on mucous membranes of eyes. Inflammation of the eye is characterized by redness, watering, and itching.

**Skin**

Very hazardous in case of skin contact. Skin contact may produce burns. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

**Ingestion**

Very hazardous in case of ingestion. Liquid or spray mist may produce tissue damage on the mouth.

**Inhalation**

Inhalation of the spray mist may produce severe irritation of respiratory tract, characterized by coughing, choking or shortness of breath.

**Chronic/Carcinogenicity**

Not available

**Teratology**

Not available

**Reproduction**

Not available

**Mutagenicity**

Not available
Section 4. First Aid Measures

Eye
Check for and remove contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used.

Do not use eye ointment. Seek medical attention.

Skin
If the chemical got onto the clothed portion of the body, remove the contaminated clothing as quickly as possible, protecting your own hands and body.

Place the victim under a deluge shower. If the chemical got on the victim's exposed skin, such as hands, gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cold water may be used. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

FOR SERIOUS SKIN CONTACT: Wash with a disinfecting soap and cover the contaminated area with an anti-bacterial cream. Seek immediate medical attention.

Ingestion
Do not induce vomiting. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

Inhalation
Allow the victim to rest in a well ventilated area. Seek medical attention.

SERIOUS INHALATION: Evacuate the victim to a safe area as soon as possible. Loosen tight clothing. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. WARNING: It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek immediate medical attention.

All Other Means of Exposure CONTACT POISON CONTROL CENTER IMMEDIATELY. Be prepared to provide hazardous ingredient information from Section 2.

Section 5. Fire Fighting Measures

<table>

</tr>
</tbody>
</table>

Slightly flammable in presence of oxidizing materials.

Autoignition Temperature 800.6° F

Hazardous Combustion Products Carbon Oxide (CO, CO2).

Extinguishing Media DRY chemical powder. Alcohol foam, water spray or fog.

Fire Fighting Instructions Small fire: DRY chemical powder.

Large fire: Alcohol foam, water spray or fog. Cool containing vessel with water jet to prevent pressure build up, autoignition or explosion.
Safety Data Sheet

Product Name: Acetic Acid
Product Code: 00100-16

Section 6. Accidental Release Measures

Small Spill
Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container. If necessary, neutralize the residue with a dilute solution of acetic acid.

Large Spill
Flammable liquid. Corrosive liquid. Keep away from sources of ignition. Stop leak if with out risk. Absorb with DRY earth, sand or other non-combustible material. Do not get water inside container. Do not touch spilled material. Use water spray curtain to divert vapor drift. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all ignition sources. Call for assistance on disposal. Neutralize the residue with a dilute solution of sodium carbonate. Be careful that the product is not present at a concentration level above the TLV.

Section 7. Handling and Storage

Handling
Keep container dry. Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/vapors/spray. Never add water to this product. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or label. Avoid contact with the eyes.

Storage
Flammable materials should be stored in a separate safety storage cabinet or room. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed. Keep in a cool, well ventilated place. Ground all equipment containing material. Keep in a cool place.

Section 8. Exposure Controls, Personal Protection

Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work station location.

Respiratory Protection
Exhaust ventilation or self contained breathing apparatus.

Skin Protection
Full suit, boots and gloves.

Eye Protection
Splash goggles.

Section 10. Stability and Reactivity

Chemical Stability: Stable

Incompatibility: N/A

Hazardous Decomposition Products: N/A

Hazardous Polymerization: No

Section 11. Toxicological Information

ROUTE OF ENTRY: Dermal contact. Eye contact. Inhalation. Ingestion.

Toxic to lungs and mucous membranes.

Section 12. Ecological Information

Possible hazardous short term degradation products are not likely. However, long term degradation products may arise. The products of degradation are less toxic than the product itself.

Section 13. Disposal Considerations

Recycle to process if possible. Consult local or regional authorities.

Section 14. Transport Information

US DOT (domestic ground) Acetic Acid, Glacial, 8,(3), UN2789 II

IATA (air) Acetic Acid, Glacial, 8, (3), UN2789 II

NOTE: It is ultimately the shippers responsibility to make hazard class determination based on their best information available.

Section 15. Regulatory Information
Section 16. Other Information

NFPA Ratings: Health: 3 Flammability: 2 Reactivity: 0 Special Notice Key: None
HMIS® Ratings: Health: 3 Flammability: 0 Reactivity: 0 Protective Equipment: 0

When handled properly by qualified personnel, the product described herein does not present a significant health or safety hazard. Alteration to its characteristics by concentration, evaporation, addition of other substances, or other means may present hazards not specifically addressed herein and which must be evaluated by the user. The information furnished herein is believed to be accurate and represents the best data currently available to us. No warranty, expressed or implied, is made and STATLAB MEDICAL PRODUCTS, INC. assumes no legal responsibility or liability whatsoever resulting from its use.
