SECTION 4: FIRST AID MEASURES

4.1 Description of First Aid Measures

First Aid

Eye contact: Flush eye with water for at while lifting the upper and lower lids. Get medical attention if irritation persists.

Skin contact: Wash exposed skin with soap and water. Get medical attention if irritation develops. Remove contaminated clothing and launder before reuse.

Inhalation: Remove to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms persists.
Ingestion: If swallowed, rinse out mouth with water. Aspiration hazard. **DO NOT** induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration into the lungs. Never give anything by mouth to a person who is unconscious or drowsy. Get immediate medical attention.

See Section 11 for more detailed information on health effects.

4.2 **Most Important symptoms and effects, both acute and delayed:** May cause mild eye, skin and respiratory irritation. Acute exposure to high concentrations can result in CNS effects of headaches, dizziness, drowsiness, or unconsciousness. Prolonged exposures may cause defatting of the skin.

4.3 **Indication of any immediate medical attention and special treatment needed:** Immediate medical treatment is required for ingestion.

SECTION 5: FIREFIGHTING MEASURES

5.1 **Extinguishing Media:**
Use dry chemical, foam, carbon dioxide (CO2), or water fog.

5.2 **Special Hazards Arising from the Substance or Mixture**
**Unusual Fire and Explosion Hazards:** Flammable liquid and vapor. Vapors are heavier than air and will travel along surfaces to remove ignition sources. Vapors will collect in low areas. Vapors may be ignited by static sparks.
**Combustion Products:** Oxides of carbon.

5.3 **Advice for Fire-Fighters:** Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 **Personal Precautions, Protective Equipment and Emergency Procedures:**
Wear appropriate protective equipment. Eliminate all ignition sources and ventilate the area with explosion-proof equipment. Prevent entry into basements or confined areas.

6.2 **Environmental Precautions:**
Prevent entry in storm sewers and waterways. Report spill as required by local and federal regulations.

6.3 **Methods and Material for Containment and Cleaning Up:**
Stop spill at the source if it is safe to do so. Absorb with an inert material. Use non-sparking tools and equipment. Collect into a suitable container for disposal.

6.4 **Reference to Other Sections:**
Refer to Section 8 for personal protective equipment, and Section 13 for disposal information.

SECTION 7: HANDLING and STORAGE

7.1 **Precautions for Safe Handling:**
Avoid eye and skin contact. Avoid breathing vapors. Use only with adequate ventilation. Wash thoroughly after...
handling. Remove contaminated clothing and launder before re-use. Keep product away from heat, sparks and all other sources of ignition. Electrically bond and ground transfer equipment. Use appropriately rated electrical equipment in areas where this material is handled and stored. Keep containers closed when not in use.

7.2 Conditions for Safe Storage, Including any Incompatibilities:
Keep product away from heat, sparks and all other sources of ignition. Electrically bond and ground transfer equipment. Use appropriately rated electrical equipment in areas where this material is handled and stored.

Protect containers from physical damage. Store in a cool area. Keep away from excessive heat and open flames. Keep containers closed when not in use. Store away from Strong oxidizing agents.

Empty containers retain product residues. Do not cut, weld, braze, etc. on or near empty containers. Follow all SDS precautions in handling empty containers.

7.3 Specific end use(s):
Industrial uses: None
Professional uses: Clearing deparaffinization

SECTION 8: EXPOSURE CONTROLS/PERSOINAL PROTECTION

</tr>
</tbody>
</table>

Refer to local or national authority for exposure limits not listed above.

8.2 Exposure Controls:
Recommended Monitoring Procedures: Collection on charcoal tubes with analysis by gas chromatography.

Appropriate Engineering Controls: Use with adequate local exhaust ventilation to maintain exposure levels below the occupational exposure limits. Use explosion-proof equipment where required.

Personal Protective Measures

Eye/face Protection: Wear safety glasses or chemical goggles as needed to avoid eye contact.

Skin Protection: Impervious clothing as needed to avoid skin contact.

Hands: Impervious gloves (butyl or nitrile rubber) are recommended for prolonged or repeated skin contact.

Respiratory Protection: None needed with adequate ventilation. If the occupational exposure limit is exceeded, use an approved organic vapor respirator. Selection of respiratory protection depends on the contaminant type, form and concentration. Select in accordance with OSHA 1910.134 or other applicable regulations and good Industrial Hygiene practice.

Other protection: Suitable washing facilities should be available.
